

SUN SAFETY

Code **JLIG** Issued **9/23**

The board recognizes the importance of using sunscreen to prevent damage to the skin as a result of overexposure to the harmful ultraviolet (UV) radiation from the sun. Therefore, it is the district's policy that students will be allowed to carry and self-apply an over-the-counter topical sunscreen product during the school day or at school-sponsored events or activities without a physician's note or prescription.

Sunscreen is defined as a topical, non-aerosol product regulated by the United States Food and Drug Administration (FDA) for over-the-counter use for the purpose of limiting ultraviolet light-induced skin damage. Sunscreen does not include prescription medication.

Sunscreen products must be appropriately labeled, in the original container, and regulated by the FDA. The sunscreen must be clearly marked with the student's name and stored in the student's book bag/backpack, locker, or other location designated by school personnel. Students will not share sunscreen products with other students.

The district or school personnel will not provide sunscreen products. Parents/legal guardians are responsible for providing sunscreen for their student's use. The district is not responsible for ensuring the student applies the sunscreen product. Students must be able to self apply as school personnel will not assist students. Parents/legal guardians are encouraged to provide guidance to their student on the proper use of sunscreen.

Any aerosol sunscreen product found in a student's possession will be confiscated by school personnel. The student's parent/legal guardian will be notified and may pick up the confiscated sunscreen product from the principal's office. The district is not responsible for sunscreen products that are lost or stolen on any school campus.

Adopted 9/12/23
